

## InTec LLC - Capability Statement

### Introduction

Founded in 2004, InTec is a *Service-Disabled Veteran-Owned Small Business* (SDVOSB) delivering a portfolio of services on multiple contracts in multiple agencies (both as a prime and subcontractor). InTec maintains a strict Organizational Conflict of Interest (OCI) posture as a "trusted agent" to customers.

InTec professionals offer decades of technical and management expertise from positions across the federal government, to include Civil, Defense, and Intelligence Agencies. Our customer and community knowledge, coupled with a proven track record, result in support and solutions that are both effective and cost efficient.

### Capabilities and Expertise

#### Systems Engineering & Integration (SE&I)

InTec employs traditional and agile engineering approaches to deliver enterprise solutions for both Cloud and legacy IT infrastructures. We design, build, integrate and test complex facets of component sub-systems into system, enterprise and web-enabled solutions that deliver against mission objectives. Our integration expertise is hardware and application agnostic to ensure "tooth-to-tail" system reliability.

#### Program Management Support

InTec provides management support at the project, program, portfolio, and enterprise levels. Our mission-focused subject matter experts provide strategies and solutions to optimize the planning, structure and performance of organizations with operational growth and/or change from conceptual strategic analysis, to end-to-end acquisition support, through operational implementation, measuring performance along the way.

#### Training Development and Delivery

InTec offers robust training and education management, development, and presentation for both online and instructor-led training. We are skilled in instructional development processes, creating or overseeing the development of materials, tasks, lesson plans, measurements, and instructional guidance. We evaluate competencies to align training to mission requirements and develop timely, engaging and meaningful solutions.

#### Intelligence Operations

With today's population explosion and flood of available information, InTec partners with customers to efficiently collect, manage, analyze, fuse, rapidly distribute and protect mission-critical information.

**NAICS Codes Supported:** 518210, 51910, 541330, 541370, 541430, 541370, 541430, 541511, 541512, 541513, 541519, 541611, 541612, 541614, 541618, 541690, 541715, 541720, 541990, 561110, 561311, 561410, 561421, 561431, 611420, 611430, 611519, 611699, and 611710
